

## Esophageal Guardian with Berry Flavor

*Get long-lasting relief from  
gastric discomfort*

Item #01737 • 60 chewable tablets

You've tried a host of regimens to soothe your digestive tract but still have issues with gastric discomfort. Here's good news: **Esophageal Guardian with Berry Flavor** provides a unique approach to protecting the delicate lining of the esophagus against harsh stomach acids.

The secret involves a protective temporary foam barrier — or raft — that forms between the stomach and esophagus<sup>1</sup> in *less than a minute* after chewing and swallowing two Esophageal Guardian tablets. Yet it provides up to *4 hours of relief!* Here's how it works:

When two ingredients in this formulation, *alginic acid* and *potassium bicarbonate*, come into contact with gastric acids, alginic acid forms a gel and potassium bicarbonate produces bubbles that get trapped in that gel. This creates a floating foam layer that sits above the contents of the stomach.<sup>1</sup> Then two other ingredients, *calcium carbonate* and *magnesium carbonate*, react with the stomach acid to create lift in the foam barrier and make it firmer.

Clinical studies show that this barrier provides *maximum* support for delicate esophageal tissues.<sup>1,2</sup> So try Esophageal Guardian and get fast-acting, long-lasting protection from gastric discomfort.
