

Glycemic Guard™

Helps manage after meal glucose levels

Item #02122 • 30 vegetarian capsules

If you've been monitoring your blood glucose levels, you know all about *fasting* blood sugar — that's your blood sugar count when you *haven't* been eating. But what about after meals? Post-meal glucose spikes can be even more important. That's why we developed Glycemic GuardTM.

Glycemic Guard™ is a once-a-day nutritional supplement that helps your body maintain already-healthy blood sugar levels, especially after meals. This NEW formula contains potent Delphinol® maqui berry extract and Clovinol® clove extract. Both affect glucose metabolism, or the way your liver processes sugars from the food you eat.

In one study, Delphinol® consumption profoundly affected post-prandial (that's after-eating) glucose and insulin levels.¹ In another study, Clovinol® helped to promote already-healthy blood glucose levels in as few as 12 days.² So keep your healthy after-dinner blood sugar where it is supposed to be with once-a-day Glycemic Guard™!

Delphinol® is a registered trademark of MNL. Clovinol® is a registered trademark of Akay USA LLC.
