

## Gastro-Ease

*Supports a healthy, comfortable stomach environment*

**Item #02100 • 60 vegetarian capsules**

Your stomach contains acids to help you break down the foods you eat. These acids would damage the delicate proteins of your stomach wall, if not for a protective coating of mucous. But internal environmental factors can inhibit your body's ability to maintain this protective layer, affecting the health of your fragile stomach lining.

Gastro-Ease contains a specialized form of zinc plus a patented probiotic strain to support the production and maintenance of this protective stomach layer. Studies show that the trace mineral zinc promotes stomach health in a variety of ways.<sup>1,2</sup> And when combined with carnosine (as zinc-L-carnosine) the effects are even more pronounced.

Due to a unique digestive mechanism, zinc-L-carnosine directly affects the cells of the stomach wall responsible for producing the protective layer of mucous, promoting a healthy inflammatory response in those cells and encouraging the normal, healthy production of mucous.<sup>3</sup>

Pylopass™ is a patented form of the healthy *L. reuteri* probiotic bacteria found naturally in your stomach. These probiotics help to balance the ratio of good to bad bacteria in your digestive tract, which can affect the health of the protective mucous layer in your stomach.

This unique, combination of zinc-L-carnosine and patented Pylopass™ probiotic is only available from Life Extension. Support a healthy and protective stomach lining, promote a balanced probiotic environment, and encourage healthy, comfortable digestion with this unique, dual-action formula!

### One vegetarian capsule contains:

Zinc (from 75 mg of PepZinGI® ..... 16.5 mg  
zinc L-carnosine)

Pylopass™ *Lactobacillus reuteri* ..... 100 mg

Other ingredients: dextrin, rice concentrate, vegetable cellulose (capsule), silica.

### Dosage and use

Take one capsule twice daily, after breakfast and before bed, or as recommended by a healthcare practitioner.

**Caution:** Supplemental zinc can inhibit the absorption and availability of copper. If more than 50 mg of supplemental zinc is taken daily on a chronic basis, 2 mg of supplemental copper should also be taken to prevent copper deficiency. Chronic ingestion of more than 100 mg of zinc daily may be immunosuppressive for some aspects of T-cell and NK cell function.
